Amandín organic products

Amandín is a range of organic products that came into being in 1995 with the aim of offering an alternative for anybody wanting to keep to a more natural, balanced diet. Our products are made using ingredients selected with the utmost care, sourced from organic farm. They do not contain lactose, and in many cases do not contain gluten either.

Our experience and constant concern with achieving excellence in each one of our products, along with the desire to innovate every day, have enabled us to create a wide variety of healthy products: functional vegetable drinks, organic stocks, dried fruit and nut creams...

Thanks to the incorporation of the latest technologies in the manufacturing processes and continuous development work of our R+D department, we work on developing new products that satisfy the nutritional needs of our consumers, with particular sensitivity at all times towards people who suffer from some kind of food intolerance or allergy.

We try to stay a step ahead of the competition, by offering different products. We are the first manufacturer to produce organic horchata (tiger nut drink), or an Organic Teff drink. Also, in 2015 we launched Oat with Cocoa, Oat, Red Fruits and Açai and our delicious Onion Soup.

Activity

Production/Distribution

Development, manufacture and commercialisation of organic products.

Brand Amandín

Type of Production / Distribution

Vegetable Drinks
 Broths and Soups
 Dried Fruit and Nut Creams
 Sauces

Import/Export Commercial Actions

On the international scene, we are consolidating markets like Brazil, Mexico, Chile... introducing new products or entering supermarket chains such as Jumbo, Walmart, in Chile, Superama in Mexico... In Latin America this year, we have new objectives, like the markets of Colombia and Argentina.

In Canada and the UAE, we are trying to increase sales, and we are also incorporating markets like Japan, where we have exported our first containers of vegetable drinks and are present in chains such as Yokado.

In Europe, we have increased our presence through markets like Greece, Lithuania, Poland, Latvia, Romania, Bulgaria, Estonia, Slovenia. In some of them, we are in large chains like Iki, Máxima, Mega Imege, Carrefour...

We had a small presence in the UK, which has increased with

the entry of our broths into the leading Whole Foods chain.

Our target for this year is France and Germany, two markets where we see an initial possibility for entering with our Oat Drink with Red Fruits, our Teff Drink, our Miso Broth, our Tiger Nut Drink (Horchata), etc...

Finally, our big 2016 goal is the American market. We are working on it, and believe that during the first semester of 2016, we will be exporting our first drinks to the US market.

We are the first manufacturer to produce organic “horchata” (tiger nut drink)
