Represented Products

Organic Passion

Herbes del Molí was pioneer in organic herbs in Spain. Since 30 years ago we produce, transform and pack organic herbs and spices, of course, we import some of our ingredients and also export some of our best productions.

Our cooperative was founded in 1986 in an ancient mill over 500 years of history. There we, three young friends passionate about aromatic plants decided to start a common project.

We specialized in cultivation, harvest, drying, distillation and transforming process of aromatic and medicinal plants. Based on the principles of organic agriculture, we have always been seeking the greatest respect for the environment and good quality plants, and bringing culture and health to all households.

Gradually, we have been evolving up today's reality, becoming a reference in the sector both nationally and internationally, not only for the quality of our products, but also for our commitment to organic farming and biodiversity protection.

Herbes del Molí represents much more than a company, we are a team of committed people full of excitement and hope, who shares a common philosophy, with a protective point of view towards the society and the environment, and we still have a lot of history to write.

Providing from raw materials to final packaging, Herbes del Molí is your passionate organic partner.
